"IGNORANCE IS THE CURSE OF GOD; KNOWLEDGE IS THE WING WHEREWITH WE FLY TO HEAVEN."

WILLIAM SHAKESPEARE

DEPARTMENT OF MANAGEMENT STUDIES
RAJIV GANDHI INSTITUTE OF PETROLEUM TECHNOLOGY
On the auspicious occasion of our 72nd Independence Day, the students of RGIPT, had a plethora of events lined up in order to make our celebration more pompous and grander. The event started with the hoisting of our National flag by our respected Director Dr P.K. Bhattacharya followed by a blissful singing of our National Anthem. The audience was then directed towards the auditorium where the splendid performances took place. The main event started with an introductory speech. The speech eulogized the importance of our motherland and the quintessential reason to celebrate its independence. Our esteemed director then bestowed upon us his sagacious words, followed by an elaboration of his aims and goals for our institution. After the Director's speech the stage was owned by our RGIPT students, who beguiled us with their power packed performances.
INDEPENDENCE DAY 2018

A passionate speech which impressed upon us the true essence of freedom and how our country is still shackled by evils like corruption, poverty, unemployment and terrorism. The speech magnified the role of youth in defeating such evils and concluded her speech on a sprightly note with the slogan of "Jai Hind". This was followed by a melodious song performance which was a perfect blend of the best of both the old and the new songs.

Then came the lively dance performance that elated us. The most commendable part of their performance was the enthusiasm with which they performed that made our day even more auspicious.

Building the momentum there were several other impromptu singing and poetry performances, presented by few of our distinguished faculties as well as the students. With this the event ended however, every performance and speech, revived in us a deep feeling of patriotism and rekindled the hope to defeat the prevailing social evils and taking our country forward with unified efforts.
EVENT: WATER-BORNE DISEASES

On 14th of July, the UBA cell of DOMS, Rajiv Gandhi Institute of Petroleum Technology, Jais, conducted an awareness programme in form of Street Theatre (Nukkad Natak) in Keshri Ka Purwa village. This event was conducted under Unnat Bharat Abhiyan which is coordinated by Ministry of Human Resource Development. The event was based on creating awareness about water borne diseases caused by the collection of stale water, pertaining to the rainy season. The Street theatre began by catching the attention of the village people through slogans, beating of the drums and banners. Several diseases such as diarrhea, cholera, malaria and dengue were brought into notice by enacting their causes, symptoms and preventive measures. The success of the event was reflected by the feedback of the village people through a quick quiz involving the children and the women of the village. The quiz was followed by giving away of certificates and prizes and the event was concluded by informing them about the UBA programme under Government of HRD ministry, India.
UBA DRAWING COMPETITION AND QUIZ

On 21st of July 2018, UBA DOMS RGIPT team again went to village Keshri Ka Purwa which is around 2.5 km away from our institution. As it was a rainy day, so there was low turnout in the school where we organized the UBA activity. Few of us went to the village to bring kids studying in the school and this process took half an hour and finally we gathered around 90 kids in the school premises where the events was held. It was a primary school run under “Sarva Shiksha Abhiyan”.

Before the event started, our UBA team had an interaction with school kids about their experience and aspirations in their life. Even though these kids belonged to low social background, they had a vision of accomplishing great things in life. Apart from that, they had interests in diverse fields like singing, poem recitation etc. One of the girls, sang a patriotic song and got huge admiration from people around. We had a great time interacting with them. At around 10:45 am the UBA team started the events by distributing drawing sheets, color pencils to the children. The exciting and thrilling response of the kids made this event a huge success. This event was organized for students from class one to class four. The drawing competition was followed by quiz competition which was held for children from class five to eight. It comprised of questions on general awareness.

It took half an hour to decide the winners of both the events, and at 12:30 pm the result was declared. UBA team distributed school bags, water bottles, pencil boxes and color sets to winners. At the end of activity team distributed chocolates and encouraged the children to keep studying diligently to achieve their goals.

The basic purpose of this activity was to encourage kids to come to school regularly as most of children skip their schooling at childhood which is the main cause of their lower skill and social development.
Intern talk was a huge success only because of the enthusiasm shown by both the speakers and the listeners, for which IICHE Family would like to thank all of you. So much knowledge got out in the air, harnessed by many, missed by many more, but at the end of the day it was really encouraging for us to see many happy faces together.

IIChE would again like to thank all the speakers to share their valuable knowledge with us, cause at the end its your love and support that keeps us going. Stay tuned with us for more such events and updates.
India in the recent years have been experiencing accelerated rate of urban growth. With compounded annual growth rate of 2.1%, India’s urban population is expected to reach 600 million in 2031 (Das, 2017). Unfortunately, urbanization in India is characterized by shortage of housing and water supply, urban encroachment in fringe areas, inadequate sewerage, traffic congestion, pollution, poverty, and unrest. In an attempt to channelize this momentous growth, the Indian Government have designed policies such as the Smart City Mission, Atal Mission for Rejuvenation and Urban Transformation, Swachh Bharat Mission etc. Academicians and researchers cannot remain immune to the changes happening around them. The conference “Mapping Urbanization in India from Socio-Spatial Perspectives” will provide an opportunity to raise issues, voice concerns, and offer solutions.

As a part of interactive learning DOMS RGIPT arranged an interaction with Mr. Sukhendu Majumdar IOCL, EXECUTIVE DIRECTOR, CORPORATE PLANNING & ECONOMIC STUDIES to give the students an overview of oil industry working. He enlightened with his sagacious knowledge and also discussed about challenges in using renewable energy & why it could not replace fossil-based energy. He also emphasized the need of an energy secured India. We discussed various unused potential resources like domestic wastage and how to use it as an economically viable resource of energy. His overzealous attitude of imparting knowledge gave students a vast ocean of knowledge.

INDIAN OIL CORPORATION LIMITED

HINDUSTAN AERONAUTICS LIMITED

DOMS, RGIPT invited Mr. Arun kr. Mathur, GM Production HINDUSTAN AERONAUTICAL LIMITED, KORWA PLANT to share his experience and enlighten the first year MBA students about the challenges as a manager he had to face. He even answered the student’s queries regarding to the current situation of aviation industry both within the country and outside. He even briefed about the international deals such as Rafael
On 14 July, Friday the second year MBA students of RGIPT witnessed the guest lecture of IOCL’s Northern Region Executive Director Mr. Harsh Sachdeva in which he talked about the gaps which exist between the academics and the industry. He highlighted this problem and according to him it is the major flaw that is faced both by the students who are newly recruited as well as the industry. According to him academics is more theoretical while industry focusses more on the practical implementation. On the same side he also mentioned that without the theoretical knowledge it is almost impossible to give the practical solution. He also told us that IOCL is planning a program in which the academicians as well as the industry personnel will work hand in hand to develop a course which covers both the aspects in the IOCL institute. He also gave a general outline of the company. Its market share which is 51% as of today. The different products that IOCL sells as well its organizational structure. He even told us about some of the history in which he mentioned that in 1928 first refueling happened in India. IOCL refines 69 million tons of crude oil while it sells 77 million tons.
The remaining 8 million tons is imported or purchased by IOCL from other private players. According to him IOCL has 104 Airline refueling fuel pumps as against BPCL’s 34 and Reliance’s 26. He told us about Retail Sales and the different types of Retail outlets like the Company owned outlets where the equipment and other stuffs are provided by the IOCL. According to him about 54% of the outlets of IOCL are company owned. He even told us about INDMAX (Switch on and off technology) which is developed indigenously by IOCL and how IOCL is earning a share of its revenue by selling this technology. He even talked about Octamx which is also a new process. Last but not the least he shared two stories one of which is about an American Gangster and his friend who was a lawyer. During 1920’s that gangster used to commit all sorts of crimes and the lawyer used to protect him. However, one fine day the lawyer confessed all of his misdeeds and the gangster was caught and jailed. Within the following year the lawyer was shot dead. In the second he told how the lawyer’s son got a medal for his bravery in the second world war. Through these stories he told us the concept of GRIT. According to him grit is the most necessary thing that we require for to attain success in our lives.
"RGIP is not afraid to offer courses which are niche, even when a specific subject area is so new that no curriculum or text exists. For me, this program was not confined to those four walls of floor. The curriculum, teachers and even fellow students always encouraged me to go beyond the classroom and add more to my learnings. My survival ride was in a paradoxical environment, where the program provided a safe cocoon, but professors prepared me for a challenging arena. in the end, it allowed me to grow in personal ways i hadn't even imagined".

ARPAN Social Club celebrated 72nd Independence Day with kids at Jyan ARPAN Teaching Centre in Mubarakpur, Mukhetia. At first, flag hoisting ceremony was conducted by Arpan Social Club members, followed by Indian national anthem along with Sarpanch, school kids as well as villagers. On this auspicious eve, Prize distributed to meritorious students who performed outstandingly in Jyan ARPAN quarterly examinations. Prizes were distributed to those students who embark their brilliance in quiz competition and also for attendance in Jyan ARPAN.

It was wonderful to see children giving mesmerizing performances and showing their talent in front of their parents. Their performance makes the eve so delightful and energetic and motivated all of us. The event came to the closure when the sweets were distributed among all kids as well as villagers and it revived in us an everlasting feeling of patriotic and unity.

ARPAN Social Club celebrated the Raksha Bandhan Festival at the Jyan Arpan Teaching Centre in Mubarakpur, Mukhetia. The kids tied “Rakhi” to Arpan Social Club members to strengthen the bonding of between them. This association also bolster kids as well as all the members for assimilation of healthy relationship between students and teachers. At the end, sweet were distributed among kids and members of Arpan Social Club.
Freshers party was organised by 2nd year MBA students for 1st year students on 9th August 2018. It was very jubilant event full of cultural events entwined by the warm welcome accorded by the seniors. First of all, first year students were asked to give a brief introduction of themselves including their background of education and their interests etc. This went very well as students got a chance to express their opinions about the new environment of college and other things.

Following this, there was a trail of cultural events like singing, poetry, mimicry etc. A sumptuous dinner was organised comprising of delicious starters and main course meal. There was also provision of a dance floor where students danced to their full on the latest tracks.

At last titles namely Mr. Fresher, Ms. Fresher, best female singer, best male singer, Mr. Decent and Mr. Entertainer were awarded to Shashank, Shrishti, Natasha, Kavish, Monis and Pranjul respectively with attractive souvenirs. Also, prizes were distributed to the winners of a competition organised by second year guys for the newly arrived MBA batch which was basically meant for the senior junior interaction. Apart from the winners and title holders, every student of first year was distributed a mini hamper comprising of chocolates and candies. Overall it was a joyous and a gala event which was concluded by a token of thanks from the first-year students to their senior batchmates for organising such an enjoyable function and giving them such a great welcome.
Third campus of RGIPT, “ENERGY INSTITUTE, BANGALORE” is proposed in Bengaluru – which is envisioned to be a distinguished energy research institute offering world class research, and education, so as to be ranked in the top 20 institutes of the world in next 20 years.

A Centre of Excellence, is proposed to be set up; a state-of-the-art campus would be developed in 150-acre land in Kambalipura, Hosakote Taluk. A temporary campus is also being set up at MUDDENAHALLI (Chikkaballapur District), the birth place of Engineer Statesman, SIR M VISVESWARAYA for commencing with three M Tech Programme designed in the fields related to ENERGY.

The purpose of the Energy Institute is to drive economic growth through Energy R&D, Technology development, Energy innovation and entrepreneurship. The INSTITUTE would conduct cutting-edge industrial, technological, and basic research; Offer education to students; and Training to industry professionals in the field of energy. The institute is also aiming to create Energy Experience Centre, Incubation Cell / E-Cell, Office of licensing and commercialization to facilitate immersive experience of energy technologies.

Energy Institute, Bangalore is launching M.Tech. Programmes in the fields of Energy from the current year (Academic Session 2018-19).

1. M.Tech in Renewable Energy (Seats - 12)
2. M.Tech in Power and Energy Systems Engineering (Seats - 12)
3. M.Tech in Energy Science and Technology (Seats - 12)
"It gives me an immense pleasure that RGIPT MBA students community is coming up with the current issue of the newsletter "INKED". Our students at RGIPT always strive for an all-round development not only to lead at professional fronts but also to become a catalyst for social change. This newsletter is also one such effort in the same spirit. I congratulate our students and wish them good luck."
